INTEL OPTANE 512GB PERSISTENT MEMORY 100 SERIES FOR HPE (835810- B21)

Persistent Memory

WHAT'S NEW

- Intel Optane persistent memory for HPE 200 series in 128 GB, 256 GB, and 512 GB capacities with two operating modes. Memory Mode and App Direct Mode determine which capabilities are available.

OVERVIEW

Do you need a data center infrastructure that can manage vast amounts of data, while lowering overall TCO?

Intel® Optane™ persistent memory for HPE is ideal for enterprise customers who need to consume and quickly manage vast amounts of data while running structured data management, analytics or virtualized workloads. Intel Optane persistent memory for HPE affordably expands memory

capacity and adds low-latency access to persistent data, combining the best of memory and storage traits into one transformative product, while lowering overall TCO.

Intel Optane persistent memory for HPE brings massive data sets closer to the CPU for faster time to insight. It increases data center resiliency and takes database restart times from hours down to minutes or seconds. This allows access to use cases that were previously unavailable with traditional storage. Data can now be stored locally and accessed remotely to provide fast, high-capacity, immediate, consistent in-memory databases.

FEATURES

Single Technology Configured as Large Server Memory or Fast Storage Data Center Complexity

Intel Optane persistent memory for HPE can move, store, and process larger data sets closer to the processor.

App Direct Mode – both byte and block addressing supported.

DIMM form factor installed in a server memory slot.

Up to 1.6x more virtual machines while in memory mode. [1]

Up to 3x more performance than NVMe SSDs. [2]

Cost-effective Dense Memory for Larger Compute Needs

Intel Optane persistent memory for HPE is more affordable than the equivalent DRAM.

Offers higher capacity than what is achievable with DRAM alone.

Up to 2x the capacity of DDR4 server memory. [3]

Available in 3 different capacities –128 GB, 256 GB, 512 GB.

Configurations with lower \$/GB than DRAM-only configs.

Transform Critical Data Centric Workloads

Intel Optane persistent memory for HPE boosts the performance of data-intensive applications.

Enables more compute capability for memory-intensive applications.

Delivers more server instances, improves service scalability and ownership costs for virtualization workloads.

Take Advantage of HPE Reliability Features in both Memory Mode and App Direct Mode

HPE provides an advanced error correcting code (ECC) feature, making it possible to correct memory errors that might go uncorrected and cause unplanned downtime.

Advanced ECC memory is the default memory protection mode for HPE servers.

Smart Data Integrity Check during boot in App Direct Mode.

Increased patrol scrub interval, especially for Memory Mode.

More aggressive HPE SmartMemory recovery algorithm.

Technical specifications

Intel Optane 512GB persistent memory 100 Series for HPE

Product Number (SKU)	835810-B21
NVDIMM type	3D XPoint Technology
NVDIMM capacity	512 GB
DIMM native speed (MT/s)	2666 MT/s
Non-volatile media	3D XPoint
Backup power source	N/A
Maximum number of NVDIMMs	2S (12) and 4S (24)
Compatible DIMM types	RDIMM and LRDIMM
Product Dimensions (metric)	13.34 cm x 0.81 cm x 3.13 cm
Weight	53 ± 2 g

Most, if not all IT organizations are on a digital transformation journey — each at a different stage. With over 11,000 IT projects conducted and 1.4 million customer interactions each year, [HPE Pointnext Services](#)' 15,000+ experts and its vast ecosystem of solution partners and channel partners are uniquely able to help you at every stage of your digital transformation. We bring together technology and expertise to help you drive your business forward and prepare for whatever is next.

Advisory and Professional Services help you accelerate your digital transformation. [Operational Services](#) help you remove complexity and respond rapidly to business demands.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

- **[HPE Datacenter Care](#)** helps modernize and simplify IT operations. Partner with an assigned account team, access technical expertise, an enhanced call experience gives you priority access, choose hardware and software support, implement proactive monitoring to help stay ahead of issues, and access HPE IT best practices and IP.
- **[HPE Proactive Care](#)** offers an enhanced call experience and helps reduce problems with personalized proactive reports and advice. This also includes collaborative software support for Independent Software Vendors (ISVs), (Red Hat, VMWare, Microsoft, etc.). [Read more](#)
- **[HPE Foundation Care](#)** helps when there is a problem and has a choice of response levels. Collaborative software support is included and provides troubleshooting help for ISVs running on your server. [Read more](#).

Other related services

[Defective Media Retention](#) is optional and applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

[HPE Service Credits](#) offers a menu of technical services, access additional resources, and specialist skills.

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.
